

The endpoint security market is expected to reach \$18.6 billion by 2027, at a CAGR of 5.9% during the forecast period from 2020 to 2027.

Endpoint security serves a critical step in securing endpoint devices such as desktops, laptops, and mobile devices among others, that act as point of access to any structured network. Such endpoints can be vulnerable to malicious attacks from hackers and viruses and can exploit at the expense of cybersecurity. Endpoint security has gained a greater importance over the years and has become a common part of individuals' life those are associated with a computer or smartphone and smart devices. Endpoint security market technologies are packed with several benefits such as protection for vulnerable services; provide network security for internet, cloud security, and enhanced data privacy & policy enforcement. Endpoint security against online threats holds a greater significance in today's digital changing landscape.

Here are the top 10 companies operating in [Endpoint Security Market-](#)

Carbon Black Inc.

Carbon Black is a leading provider of next-generation endpoint security. As a cybersecurity innovator, the firm has pioneered multiple endpoint security categories, including application control, endpoint detection and response, and next-generation antivirus.

The company offers endpoint security solutions and services, such as advanced threat protection, malware protection, incident response, PCI Compliance, and Windows XP end of life security.

With its subsidiaries and a strong network of distribution, the company has its presence in various regions such as North America, Europe, and Asia-Pacific. Some of its subsidiaries are Confer Technologies Inc. (U.S.), Visitrend Inc. (U.S.), Objective Logistics Inc. (U.S.), and Carbon Black U.K. Limited (U.K.).

Check Point Software Technologies Ltd.

Check Point Software develops, markets and supports a range of software and hardware products and services for information technology (IT) security and offers its customers a network and gateway security solutions, data and endpoint security solutions, and management solutions. The company operates through three business segments, namely, Product & Licenses, Security Subscription, and Software Update & Maintenance.

Check Point Software offers various endpoint security solutions, such as unified threat management, security management, firewall, advanced threat prevention, remote access VPN, and security compliance.

With its subsidiaries and a strong network of distribution, the company has its presence in various regions, such as the Americas, Europe, Asia-Pacific, and the Middle East & Africa. Some of the subsidiaries of Check Point are Dome9 Security, Inc. (U.S.) and NFR Security, Inc. (U.S.).

Comodo Security Solutions

Founded in 1998 and headquartered in New Jersey, U.S., Comodo Security Solutions is a leading cybersecurity platforms provider. The company offers antivirus, internet security, endpoint security, and website security.

With its subsidiaries and a strong network of distribution, the company has its presence in North America, Europe, and Asia-Pacific. Some of its subsidiaries are Comodo Communication Inc. (U.S.) and DNS.Com LLC (U.S.).

FireEye Inc.

FireEye is a leading provider of security solutions. It also provides malware protection systems and network threat prevention solutions. The company offers web, email, and file security, as well as malware analysis. The company offers a single platform that blends innovative security technologies and threat intelligence.

FireEye mainly operates in three business segments, namely, Product & Related Subscription & Support, Cloud Subscription & Managed Services, and Professional Services. The company offers various security solutions, such as endpoint security, next-generation threat protection, email security, and threat intelligence.

With its subsidiaries and a strong network of distribution, the company has its presence in the Americas, Europe, Asia-Pacific, and the Middle East & Africa. Some of its subsidiaries are Verodin, Inc. (U.S.), Mandiant (U.S.), and Ensigna Security Inc. (U.S.).

McAfee LLC

Founded in 1987 and headquartered in California, U.S., McAfee is a leading-edge cybersecurity company. The company provides advanced security solutions to consumers, small and large businesses, enterprises, and governments. It offers various solutions & services, such as endpoint security, data loss prevention, mobile security, encryption, web gateway, server security, intrusion prevention system, identity & access management, and enterprise security services.

With its subsidiaries and a strong network of distribution, the company has its presence in various regions, such as North America, Asia-Pacific, Latin

America, and the Middle East & Africa. Some of the subsidiaries of McAfee are Solidcore Inc. (U.S.) and Nitro Security Inc. (U.S.).

"Meticulous Research in its latest publication on global Endpoint Security Market has predicted the growth of 5.9% CAGR during the forecast year 2020 – 2027"

Palo Alto Networks Inc.

Palo Alto Networks provides network security solutions. The company offers firewalls that identify and control applications, scan content to stop threats, prevent data leakage, integrated application, user, and content visibility. The company operates through two business segments, namely, Product and Subscription & Support.

The company offers various solutions, such as cloud security, SaaS security, network security, threat and malware prevention, next-generation firewall, enterprise security, cyber threat alliance, URL filtering, endpoint security, and cybersecurity canon.

With its subsidiaries and a strong network of distribution, the company has its presence in the Americas, Europe, and the Middle East & Africa. Some of its subsidiaries are Demisto, Inc. (U.S.), Zingbox, Inc. (U.S.), and Cyber Secdo Ltd. (Israel).

Sophos Ltd.

Sophos is a leader in IT security and endpoint data protection. The company provides the biggest set of security and services for enterprise-grade apps, whether on-premises or across any multi-cloud environment. The company operates through three business segments, namely, Subscription, Hardware, and Other. Sophos develops products for communication endpoint security, antivirus, mobile security, web protection, encryption, next-gen unified threat management, and network security.

With its subsidiaries and a strong network of distribution, the company has its presence in North America, Europe, Asia- Pacific, and the Middle East & Africa. Some of its subsidiaries are Invincea (U.S.) and Sophos Group Plc (UK).

Nortonlifelock Inc.

Nortonlifelock formerly known as NortonLifeLong, Inc. provides secure storage and systems management solutions that help consumers secure and manage their information. The company operates in two business segments such as enterprise security and consumer digital safety.

The company offers an endpoint security service, threat protection, antivirus and malware protection, information protection, identity protection, and cloud data protection. With its subsidiaries and a strong network of distribution, the company has its presence in various regions such as the Americas, Europe, and Asia- Pacific.

Trend Micro

Trend Micro is a global leader in cybersecurity. The company develops enterprise security software for servers, containers, cloud computing environments, networks, and endpoints. Trend Micro operates through two business segments, namely, Enterprises and Consumer. The company develops products for endpoint security, email security, network security, malware protection, and advanced threat prevention.

With its subsidiaries and a strong network of distribution, the company has its presence in North America, Europe, Asia-Pacific, Latin America, and the Middle East & Africa. Some of its subsidiaries are Cloud Conformity Pty Ltd (U.S.) and Mobile Armor Inc. (U.S.).

Microsoft Corporation

Microsoft is a multinational technology company. The company provides software products, such as Internet Explorer, Microsoft Windows OS, Microsoft Office Suite, and Edge Web browsers. The company operates in three business segments, namely, Productivity and Business Process, Intelligent Cloud, and Personal Computing. Microsoft offers various endpoint security solutions, such as cloud security, identity & access management, intrusion prevention systems, and information protection solutions.

With its subsidiaries and a strong distribution network, the company has its presence across North America, Europe, Asia-Pacific, Latin America, and the Middle East & Africa. Some of its subsidiaries are Double Fine Productions, Inc. (U.S.), GitHub, Inc. (U.S.), Mojang (Sweden), Skype (U.S.), and LinkedIn Corporation (U.S.).
